The conference features leaders in education and green industry professionals making presentations and moderating special events.

-more-

WHY: The National Center for the Learning Environment is a nonprofit organization whose mission is to “Save our Schools.” NCLE believes it is essential to take a holistic approach to improving our schools and addressing the challenges they face. Funding is one of these challenges. The Lean Green Educating Machine Conference will teach school leaders, teachers and the community ways to save through “green” practices.
